- **Low Yielding Bulls:** \$208-\$217.50
- **Cutting Bulls:** no test

It was a great day in Crawford. We were fortunate to receive over 3 inches of rain yesterday... but only in town. Just two miles in every direction, there was very little to none. That seems to be the story of this summer. Even so, it was wonderful to see some moisture fall somewhere, and we'll take every drop we can get.

The demand for cattle continues to be incredibly strong, and buyers were active all day. Our hearts were heavy for the Betson family this week as they faced a decision that no ranching family ever wants to make. While it was undoubtedly a difficult day, we're thankful the market worked in their favor, and their cattle sold exceptionally well. We continue to keep them, and all the producers facing these heartbreaking decisions, in our thoughts and prayers as we hope for more widespread rain in the days ahead.

We are going to have more pairs next week with about 150 expected, if you wanted to bring pairs for the sale, please call and they need to be here no later than Wednesday. We appreciate the families who trust us to market their cattle, the buyers who show up week after week and our steadfast amazing crew.

~Rich & Alicia

They calved from mid-April through the end of June, with most calves arriving between April 25 and June 10. The herd was primarily bred to Jorgensen bulls. Cows have been run year-round on native range with a consistent mineral program. Calves were branded on June 18 and vaccinated with Vision 7 20/20 and Pyramid 5 SQ. Steer calves were knife-cut and implanted; Cows are not exposed; Complete dispersion due to our continued, extreme dry conditions.
